Points Regarding the Census.

The census begins April 15 and must be completed in thirty days.

The enumerators will wear a badge inscribed "United States Census, 1910."

The law requires every adult person to furnish the prescribed information, but also provides that it shall be treated confidentially, so that no injury can come to any person from answering questions.

The Census Bureau, prior to April 15, will distribute to every farm owner and tenant in this state a blank or schedule containing the Census questions relative to farm operations and equipment. This should be filled up, if possible, not later than the morning of April 15, but if anyone has been unable to fill it up by that time, he should do it as soon afterwards as he can.

People who do not speak English or who do not understand the schedule completely should get help from others, if possible, in filling it up.

The President has issued a proclamation, calling on all citizens to cooperate with the Census and assuring them that it has nothing to do with taxation, army or jury service, compulsory school attendance, regulation of immigration, or enforcement of any law, and that no one can be injured by answering the inquiries.

It is of the utmost importance that the farm census of this state be complete and correct.

Therefore every farm owner and tenant should promptly, fully, and accurately fill up the "Advance Farm Schedule" and carefully preserve it for the enumerator when he calls.

Fruit Growers

Will Meet Here This Saturday
Afternoon, April 16th.

Prof. L. R. Taft of Lansing will
Address the Meeting.

East Jordan, Mich.,
April 11, 1910.

Partly on account of the fact that there was a misunderstanding as to the date of the Fruit Growers' meeting and partly, I imagine, because the weather was ideal for farm work, only half a dozen farmers were present at the meeting held in Boyne City on Tuesday, April 5, and same was postponed until this Saturday, April 16.

Prof. L. R. Taft will be in East Jordan on Saturday, April 16, and a special meeting is called for 1:00 p. m.

Members will be notified and all are urged to attend whether members of the association or not.

I have received a copy of the report of the State Horticultural Society for each member of the Association.

Have left some of them in the law office of Knowles & Converse for members near Boyne City and will leave a supply in the County Clerk's office in Charlevoix and keep part of them at my home in East Jordan.

Members are requested to call for same.

Respectfully,
J. H. Milford, Sec'y.

Michigan Crop Report.

Lausling, Mich., Apr. 7, 1910.
WHEAT.

The condition of wheat on April first in the southern counties was 82, in the central counties and upper peninsula 93, in the northern 97 and in the State 88.

The condition one year ago, was in the State and southern counties 76, in the central counties 69 and in the northern counties and upper peninsula 83.

The average depth of snow on March 15th in the southern counties was 0.04 and in the central counties 0.10 of an inch, in the northern counties 5.15, in the upper peninsula 5.57 and in the State 1.47 inches.

On March 31st correspondents from all sections of the State report no snow in open, level fields.

The number of days protection to wheat by snow in the southern counties was 2, in the central counties 4, in the northern counties 13, in the upper peninsula 16 and in the State 5.

In answer to the question, "Has wheat during March suffered injury from any cause?" 210 correspondents in the southern counties answer "Yes" and 128 "No," in the central counties 42 answer "Yes" and 89 "No," in the northern counties 13 answer "Yes" and 108 "No" and in the upper peninsula 1 answers "Yes" and 19 "No." A covering of ice, especially on low land in the southern counties, during the latter days of February and the first decade of March, caused some damage to wheat and the want of moisture in March has somewhat retarded the growth of the plant throughout the entire State.

The total number of bushels of wheat marketed by farmers in March at 111 flouring mills is 81,059 and at 93 elevators and to grain dealers 59,726, or a total of 140,785 bushels.

RYE.

The average condition of rye is 89 in the southern counties, 95 in the central counties, 98 in the northern counties, 93 in the upper peninsula and 92 in the State.

One year ago the condition was 83 in the State and southern counties, 78 in the central counties and 88 in the northern counties and upper peninsula.

MEADOWS.

The average condition of meadows in the southern counties is 90, in the central counties and upper peninsula 94, in the northern counties 93 and in the State 92.

The condition one year ago was 77 in the southern counties, 83 in the central counties, 86 in the northern counties and upper peninsula and 81 in the State.

FRUIT.

As a result of the mild winter and the warm weather in March, the buds are probably two to four weeks in advance of usual conditions at this date with continued mild weather and no frost there should be an abundant crop of fruit.

The prospect for an average crop of

the various kinds of fruit in the northern counties of the State is as follows: Apples, 85; pears, 80; peaches, 81; plums, 85; cherries, 92; small fruit, 94.

In regard to the question "Are peach orchards being sprayed for curl leaf?" 76 correspondents answer "Yes" and 130 "No."

What About the Man Around the Corner?

On a certain Sunday last Fall I attended the morning service of a village church in an Eastern State. At the close of the sermon—a helpful sermon—the pastor reminded his congregation of the barrel of clothing regularly sent at this time to the poor of a city some fifty miles away.

I was just a bit startled, because I have been accustomed to hear city pastors remind their congregations of barrels to be sent to the poor of villages. It had not occurred to me that villages might be concerned about the poor in cities. I knew, of course, that cities whose churches are sending barrels to villages have their own desperately poor always with them, and I was in a position to know that this village whose church was preparing a barrel also had its proportion of sadly reduced families.

The situation struck me somehow as incongruous, illogical, out of gear. Why should good people in the cities distress themselves about suffering in the villages, and good people in the villages distress themselves about suffering in the cities, and both feel apparently little distress about the suffering right at their very doors?—both apparently be more concerned about the distress of a stranger whom they have not seen than they are about the suffering of a neighbor whom they know?

Are warm-hearted helpfully inclined people more distressed by suffering a thousand miles, fifty miles, away than they are by suffering around the corner? I could not seem to get an answer to this query until I turned it on myself. Is it true of me? Am I more distressed, am I more strongly appealed to, by remote suffering?

Well, it's unselfish and good for us to think of others. Yes, but that poor devil right around the corner. Oh, he might not like it. He may be proud, and besides, he does not seem so badly off. At any rate, he got himself where he is, and he will be stronger and have more self respect to dig his own way out.

True enough! And that other poor devil fifty miles away?

Oh, that's different—terribly pathetic case! What makes it so different?—Erman J. Ridgway in the Delineator for May.
